Validate & verify your drivers.

with DAVIS Licence Check

The DAVIS Licence Check solution enables organisations to actively manage driving licence eligibility ensuring driver risk is reduced and compliancy assured. An essential process for organisations with employees that drive on work related business.
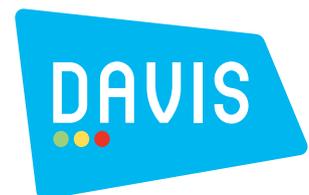

DAVIS Licence Check

- Is a safe, secure and reliable cloud solution which records, stores and verifies driving licence information
- Checks the driver has the correct category entitlement and eligibility to drive
- Checks the licence for current endorsements, penalty points and convictions
- Identifies and monitors 'high risk' drivers
- Comes with a dedicated customer support helpdesk included without additional cost
- Service uses data supplied by the DVLA
- Integration into in-house software applications if desired

How will it improve efficiency?

- Automatic scheduling of driving licence rechecks without the need for human intervention
- Provides results in seconds
- Manages the full driver consent process, with e-consent option, which is valid for 3 years
- Triggers comprehensive notifications and immediate warnings
- Reduces paperwork and administration for both office based employees and drivers

Keeping your grey fleet in check.

with DAVIS Grey Fleet Management

The DAVIS Grey Fleet Management solution enables organisations to actively manage driver and vehicle eligibility ensuring corporate risk is reduced and compliancy assured. An essential process for organisations with employees that drive their own vehicles on work related business.

DAVIS Grey Fleet Management

- Checks vehicle information, including vehicle tax and MOT
- Records critical vehicle information including age of vehicle, CO2 emissions, engine size and other V5C information using the vehicle registration number
- Insurance checks and verification available
- Allows uploads of critical driver documents and personal image
- Empowers organisations to minimise corporate risk, streamline processes and be legally compliant
- Provides a clear audit trail to demonstrate the employer is addressing its statutory obligations

How will it improve efficiency?

- Allows automatic approval of vehicles falling within company policy and guidelines
- Structured driver declaration process
- Automatic calendar notifications and warnings
- Newscast facility allowing instant information to be broadcast to multiple employees
- Central repository for managing critical driver and vehicle information

The fastest way to authenticate your drivers.

with DAVIS CDR

Introducing the quickest and easiest way to check the authenticity of a UK, EU and International driving licence, CPC & Tacho Card. DAVIS CDR is an innovative compact counter top device which scans ID1 cards in seconds.

DAVIS CDR scans both sides of the card and validates licence security features and layouts. Essential driver information is instantly captured and uploaded into an individual driver record. Ideal for organisations carrying our multiple driver checks.

DAVIS CDR

- Instantly authenticates a driving licence or tacho/cpc card when presented into the reader
- Instantly captures data from UK, EU and International Driving Licences, CPC & Tacho cards
- Initiates the consent process required for licence checking
- Consistent, repeatable and robust security checking process
- Data can be integrated into other software applications

How will it improve efficiency?

- Eliminates the manual process of checking licences
- Improves data accuracy by auto-capturing data
- Ideal for bulk submissions

Supports DAVIS Licence Check and Grey Fleet Management solutions

Identify high risk drivers.

with DAVIS Driver Risk Assessor

DAVIS Driver Risk Assessor is a cost-effective online profiling solution which enables organisations to better manage occupational road risk. By analysing attitude and behaviour, 'at risk' drivers are quickly identified, giving organisations the opportunity to tailor the support and training provided for these individuals, rather than adopting a one-size-fits-all approach.

The online assessment has a mix of video, interactive and multiple-choice questions to better understand the driver's psychology and measures all road-risk areas. This solution will help organisations protect the safety of its employees, and in turn safeguard the general public.

DAVIS Driver Risk Assessor

- Leading psychometric assessment software
- Featuring a series of online tests with multiple choice, interactive and video assessments
- Covers road knowledge, observation, hazard perception, distance following, reaction and safe driving policy knowledge
- 20-30 minute web-based survey and assessment

How can DAVIS help?

- Rapidly profiles the risk of your drivers flagging them as high, medium or low risk
- Identifies the drivers that need further support and training
- Establishes a safer driver network
- Helps you to protect the safety of your employees and members of the public
- Risk score is logged against a driver profile which is further enhanced when incorporating DAVIS Licence Check results (if applicable)
